

Environmental Volunteers

Hands-on environmental education programs that improve student learning since 1972

I am a volunteer with the Environmental Volunteers, an organization that presents natural science programs in schools and encourages youth to become stewards of our shared environment. I'm asking for you to support my work, teaching natural science to students and inspiring them to love science and nature. Here is a bit of information that will give you an idea of the kind of work we do and the impact we have on kids.

- 100 trained volunteer docents will deliver 400 classroom science discovery programs this year.
- 150 field study adventures will inspire thousands of students to taste, touch, and smell their way to a nature education.
- 11,000 students will participate in our programs this year, and still we cannot meet the demand.

More teachers are turning to us to assist them in teaching environmental science. With the severe budget cuts facing schools, teachers are pleading with us to help preserve science education and help them foster environmental stewardship. We are committed to saying "yes," and with your help we can.

With your support, thousands of children can have the same experience as this second grader:

Thank you for teaching us about nature and animals. I liked the blue jay. I hope you come again to teach us new cool things.

Your nature student,
Jasmine

Your donation to the Environmental Volunteers will directly support my work. It will help introduce children to the wonders of nature and provide them a solid science education so that they have the foundation to become stewards of our earth.

Ways to Donate

All donations are tax deductible.

1. Donate by credit card at www.evols.org/donate through our secure website.
2. Checks may be sent to:
Environmental Volunteers
3921 East Bayshore Rd
Palo Alto, CA 94303
3. Or you can provide your credit card information by calling the Environmental Volunteers office at – 650-961-0545.

Please mention my name so that I can know to thank you. With your support I can bring even more bright-eyed children in touch with nature. Thank you.
